CROSS, RUSTIC, & WOODLAND TIMBERS RADIANT HEAT LOGS

Cross, Rustic, and Woodland Timbers form Hargrove's exciting Radiant Heat Vented log series, offering much greater heating efficiency than traditional vented gas logs. These models are crafted in ceramic fiber, using an innovative new molding process, which allows us to recreate the highly detailed textures of nature found in our standard log series, while taking advantage of ceramic fiber's superior heat reflectivity and ability to glow naturally at a lower temperature than traditional log materials. Our Radiant Riser™ technology directs heat forward and helps push it into the room, giving radiant heat comparable to vent-free logs.

When ordering a Cross, Rustic, or Woodland Timbers set, choose a Loose Log from the top of the page and match it with an Accessory Kit from pages 4 or 5.

MOUNTAIN TIMBER

Mountain Timber sets 30" and larger feature the Ember Supreme ES burner system, with a larger and deeper single burner pan and a deeper grate, to give you more flame than possible with previous designs for deeper fireplaces. Mountain Timber 30" sets are available for standard or Ember Supreme ES accessory kits. 21", 24" & 30" sets are designed for standard depth accessory kits and are listed on page 3. **PLEASE NOTE:** Ember Supreme ES Accessory kits are not available in liquid propane configurations.

When ordering a Mountain Timber set, choose a Loose Log from the top of the page and match it with an Accessory Kit from the bottom of the page.

SUMMIT OAK SYSTEMS

When ordering a Summit Oak set, choose a Loose Log set and match it with an Accessory Kit on this page.

Summit Oak was specifically designed for large masonry and rumford-style fireplaces, offering more height and greater depth than a standard large log set.

Summit Oak features the Summit Oak burner system, with a secondary burner in the upper rear area of the set, to give you more flame height than possible with previous designs.

KODIAK DOUBLE AND TRIPLE STACK SYSTEMS

When ordering a Kodiak Double Stack set, choose a Double Stack Loose Log set and match it with an Accessory Kit on this page.
To order the Triple Stack kit, choose the appropriate Double Stack logs and accessory kit, and add the Triple Stack logs and kit.

Kodiak was specifically designed for large masonry and rumford-style fireplaces, offering 1" grate stock, more height and greater depth than a standard large log set, with a Double or Triple Stack accessory kit.

Kodiak's Double Stack burner system, features an ember burner in front, with the main burner in the middle area of the grate. The Triple Stack option add a third rear burner and grate pedestal, to give exceptional flame height and set depth, for very large fireplaces.

We recommend using between 2"-4" of glass on our burner kits.

1 lb of Fireglass and Firebeads cover approximately 20 cubic inches

To determine how much glass is necessary, determine the volume of the area you would like to fill.

For fireplaces (Fireplace width X Fireplace Depth X Glass Depth)

For Firepits (3.14 X Radius of circled squared X Glass Depth)

Once the volume is calculated divide the volume by 20 to determine the lbs of glass necessary to fill the space.

To minimize the amount of glass needed volcanic cinder (VC) can be used as filler.

To minimize the appearance of soot, use darker colored glass when burning propane (LP) gas.

HIGHLAND GLOW VENT FREE

Tested to the ANSI Z21.11.2 2003 (vent-free) and Z21.60 2003 (vented) Standards

All Hargrove Vent Free models operate as Unvented Room Heaters when used in a masonry or manufactured fireplace with the flue damper closed or with vent free fireplaces listed and approved with Hargrove products.

Highland Glow Vent Free models are dual listed, and may be operated as a vent free set, or may be operated as a vented log set, in a wood burning fireplace with the chimney flue damper fully or partially opened.
